ABOUT SERVICES

GLOBAL CYNAX provides a range of multi-disciplinary engineering services & solutions across the country. Over the years, we have supported the clients and have emerged as a partner-of-choice for meeting their engineering needs.

We've been in engineering business for long time. That's enough time to know that what you want is an accurate, reliable, honest, and comprehensive surveying and engineering services firm that prevents delays and errors. In the end, our years of experience have told us one thing – our business is built on relationships. We know what you want and what you need. And we deliver exactly that, as your trusted partner in the office and field.

OUR CORE COMPETENCIES

Airend Overhauling

We are fully capable of handling screw compressor's airend servicing and overhauling with utmost efficiency. We collect airends from the client's site and bring it to our facility unit. Then necessary service works carry out including replacing of defective parts & finally run it like a new.

Compressor Troubleshooting

Without a well-functioning air compressor, a body shop cannot perform many of its important services. Since many machines and tools are powered with air, the compressor is an especially important machine, and it's quite the headache when it goes out of control.

OUR CORE COMPETENCIES

Compressor Overhauling Service

A compressor overhaul usually involves an inspection and replacement of worn parts within your compressor. Overhauling an air compressor can be achieved via Global Cynax which carry out very professional way.

Annual Maintenance Contract

Annual Maintenance Contract of compressor's inclusive of repairs, replacement and preventive maintenance work. Global Cynax carry out all service and maintenance jobs of the clients on priority basis who are under AMC agreement.
